Jun,

I found a typo in the Response to Comments version I previously sent. Please use this version. Also reattaching the final permit, but it hasn't changed.

Also – please remove the word “DRAFT” from the title of this webpage: <https://www.epa.gov/caa-permitting/south-fork-wind-llcs-south-fork-windfarm-draft-outer-continental-shelf-air-permit>

Thanks!

Thanks, Jun. The test revisions look good. Attached is the signed permit and RTC document. Please link these documents to the text on the South Fork webpage and proceed with publishing the revisions ASAP.

Let me know once the pages are live.

Thanks again,

Eric

Subject: EPA - New England Internet Project Ready for Proof/Review

FYI,

The project has been posted onto the development site for proof/review.

Project Name: CAA Permitting Updates

Project Description:

Today we are issuing the final permit for the South Fork Windfarm. Attached is the list of updates for the Region 1 website. We intend to issue the permit by COB today and need to have the website revisions published today. I will send the two final documents later for posting once the permit is signed (1. Final Permit and 2. Response to Comments). Can we go ahead and get the pages ready to go except for these two documents?
